

# SAP Activate SAP S/4HANA Private Edition

Trainer: Mr Giridharan Somaskandan

May 2024

## SAP S/4HANA Private Edition : SAP Activate – Certification

## SAP S/4HANA Cloud Private Edition, implementation with SAP Activate

CERTIFICATION E\_S4CPE STAY CERTIFIED

#### SAP Certified Specialist - SAP S/4HANA Cloud Private Edition, implementation with SAP Activate

🗄 40 Questions 🝈 1 hr 30 mins 🙀 63% cut score View sample questions

#### Overview

This certification exam validates that the candidate possesses the core knowledge required to support SAP S/4HANA Cloud Private Edition. It is designed for the Implementation Consultant & Project Manager who needs to prove that he/she has an overall understanding and in-depth skills of SAP S/4HANA Cloud Private Edition and can participate in his/her role as a member of an implementation project. This is an entry level certification, however, it is recommended to have at minimum one core SAP S/4HANA line of business certification before taking this exam, as the implementation and functional consultant profile should already come with core SAP S/4HANA experience.

#### Roles

Consultant

#### Available Languages

English

#### Exploring Cloud ERP

#### https://learning.sap.com/learning-journey/explore-sap-cloud-erp

#### LEARNING JOURNEY

#### **Exploring SAP Cloud ERP**

#### Overview

This learning journey is designed for you to explore SAP's cloud ERP solutions, the different deployment options available for the ready-to-run (GROW with SAP) and the tailored-to-fit (RISE with SAP) use cases and set up an implementation project for success with the Cloud Mindset.

#### Learning objectives

After completing this learning journey, you will be able to distinguish SAP's cloud ERP solutions and assess which deployment option is recommended for different use cases, as well as the tools and technologies that can be used for application lifecycle management, SAP Best Practices solution processes, integration, and extensibility.

## Implementing SAP S/4HANA Cloud Private Edition

https://learning.sap.com/learning-journeys/implementing-sap-s-4hana-cloud-private-edition

# Implementing SAP S/4HANA Cloud Private Edition

🕅 12 Units 🖲 11 hrs 🔒 Free 💽 Certification

#### Overview

This learning journey focuses on the fundamental knowledge required to implement SAP S/4HANA Cloud Private Edition in both system conversion and new implementation scenarios.

#### Learning objectives

After completing this learning journey, you will be able to explain and execute core implementation project tasks to deploy, adopt, and extend SAP S/4HANA Cloud Private Edition. This includes:

- Building the implementation team, defining system landscapes, setting up systems for implementation, creating users and defining authorizations.
- Gathering data in fit-to-standard workshops, validating and configuring business processes.
- Working with the SAP Fiori Launchpad, applying extensibility tools and concepts, setting up integration scenarios, migrating data, and testing configured processes with automation.

#### Your current experience in this topic

# Certification Course Academy

#### **Certification Journey**

https://knowledgecom.izeberg.ai/

TEAMS link : <u>https://bit.ly/4bieJyn</u>

#### Key to Success

- ✓ Self Studies in SAP Learning Hub and Learning Journey
  - $\checkmark~$  Read all the contents and make notes
  - $\checkmark$  Complete the quiz at the end of each topic
- ✓ Attend all Coaching sessions
  - ✓ Fast-track to certification
  - ✓ Clarification sessions
- ✓ Take Notes (Handwritten or Digital)
- ✓ Mock Exams
  - ✓ Take as many mock exams as you like

# Cloud ERP

#### Introducing Cloud Computing

## 😤 4 Lessons 🛛 🥥 25 mins

- Summarize the foundational concepts of cloud computing
- Differentiate between the three cloud deployment models
- Differentiate between the three cloud computing services
- Map SAP products to computing services
- Explain governance responsibilities for the cloud deployment models and computing services

#### Navigating SAP's Portfolio with Embedded Intelligence & Sustainability

😤 3 Lessons 🛛 🥥 30 mins

- Summarize the main components of SAP's Cloud ERP portfolio
- Define how artificial intelligence is embedded in SAP's solutions
- Explain how sustainability is interwoven in SAP's solutions

#### Choosing a Deployment

😤 4 Lessons 🛛 🥥 50 mins

- Provide an overview of SAP S/4HANA
- Define the different 2-tier ERP deployment models
- Differentiate the GROW and RISE with SAP enablement packages
- Describe the components of the GROW and RISE with SAP enablement packages
- Explain the dimensions of licensing and digital access
- Explain how the Digital Discovery Assessment helps identify the best Cloud ERP product for a customer

## Implementing with a Cloud Mindset

#### 😚 6 Lessons 🛛 🥥 1 hr 10 mins

- Define the characteristics of the cloud mindset
- Identify how to consume the SAP Activate methodology through SAP Cloud ALM
- Explore the SAP Best Practice solution processes in SAP Signavio Process Navigator
- Identify the capabilities of the SAP Cloud Integration Suite
- Explain the clean core concept
- Define the different types of extensibility and the relevant tools
- Manage organizational change successfully

#### **Cloud Mindset Overview**

#### SAP Activate Implementation Phases

## **Exploring SAP's Cloud Integration Technologies**

## **Cloud Integration Technologies**

## **Utilizing the Clean Core Strategy and Extensibility Tools** Extensibility Types and Tools

## SAP's Organizational Change Management Framework

# Implementing SAP S/4HANA Cloud Private Edition

## Introducing SAP S/4HANA Cloud Private Edition

😂 2 Lessons 🛛 🥥 50 mins

- Describe characteristics of SAP S/4HANA Cloud Private Edition
- Provide an overview of the RISE with SAP Methodology
- Explain how the lines of business interact with one another in the overall scope
- Describe the transition paths to SAP S/4HANA Cloud Private Edition

## **Building YOUR Intelligent Enterprise**

Comprehensive, intelligent, customer-specific offering

SAP Readiness Check, Custom Code Migration App, SAP Learning Hub

SAP S/4HANA Private Cloud Edition

On Infrastructure Provider of Choice

#### **Optional components**

Additional services

Analyze how processes perform, get tailored recommendations, and benchmark against industry standards.

Complement, extend and integrate with SAP, partner, or thirdparty solutions using the same data model and business services as SAP applications.

Digitalize collaboration with all of your trading partners.

Tools and services from SAP to support your whole journey that can be augmented by SAP's strong ecosystem

## Build your Intelligent Enterprise: S/4HANA Private Cloud Edition

## Cloud Value SAP S/4HANA Private Cloud Designed to provide innovation and cloud value while allowing customers to retain their investments by converting their existing systems.

- Full S/4HANA scope including LOB and industry processes, supporting 25 industries
- Code enhancements & code modifications supported
- Expert configuration via full IMG access
- Operating Expense via subscription-based commercial model
- Hyperscaler infrastructure to scale up or down quickly

#### Simplicity

- Rapid conversion of your existing ERP/ECC environments to a modern, cloud-based architecture
- Prior ECC and partner solution investments safeguarded
- CapEX to OpEx with a subscription-based commercial model
- Transformation to a pure SaaS-based landscape at your pace
- Partner add-ons allowed to enhance competitive differentiation

## SAP S/4HANA Cloud Private Edition

New user experience

Enables an **evolutionary journey** to the cloud

Ready-to-run best practices to realize results right away

Market-leading **localization** and **customization** capabilities

**Regular feature deliveries** 

Seamless migrations from SAP ERP

## RISE with SAP Methodology & SAP Activate Methodology Roadmap

#### SAP Activate Methodology for RISE with SAP S/4HANA Cloud Private Edition

#### RISE with SAP Methodology Components

#### **Clean Core Concept**

Keep competitiveness while reducing complexity.

Decouple extensions from standard.

Control data according to latest standards.

Keep the landscape reliable and flexible.

Keep the operations effective and efficient.

# **Business Processes** 2 Extensibility 3 Data Integration 4 Operations 5

## Customer Journey Transition Paths

| Term                      | Definition   |
|---------------------------|--|
| New Implementation        | Brand new installation of a system, also known as a Greenfield implementation.<br>Semi-Greenfield refers to an installed-based customer starting with a new<br>implementation.                 |
| System Conversion         | Guided technical process for a 1:1 conversion of an existing SAP ERP system to SAP S/4HANA. Example: convert SAP ECC to SAP S/4HANA Cloud Private Edition.                                     |
| Lift & Shift              | Lift and move an entire system without change to a new landscape (typically involves a system copy). Example: move from SAP S/4HANA on premise 2023 to SAP S/4HANA Cloud Private Edition 2023. |
| Selective Data Transition | Tool-based approach to selectively migrate and transform configuration & master and transaction data. Example: move from SAP ECC to SAP S/4HANA Cloud Private Edition.                         |
| Upgrade                   | Upgrade system to a new software version base release. Example: upgrade SAP S/4HANA from base release 2022 to 2023.  |
| Update                    | Apply new software updates to a system, such as a Feature Pack Stack<br>(FPS) or Support Pack Stack (SPS).   |

#### Analysis of Customer Transitions

#### **Transition Decision Tree**

## Common Transition Paths to SAP S/4HANA Cloud Private Edition

| Source                                 | Common Transition Paths  | Destination                          |
|--|--|--------------------------------------|
| SAP R3 or 3 <sup>rd</sup> Party System | New Implementation   |                                      |
| SAP ERP                                | New Implementation<br>System Conversion<br>Selective Data Transition*    |                                      |
| SAP S/4HANA On Prem**                  | Lift & Shift   | SAP S/4HANA Cloud<br>Private Edition |
| SAP ERP on HANA                        | Lift & Shift followed by System Conversion<br>Selective Data Transition* |                                      |

\*On exception basis only for partners

\*\*Source release must have at least 12 months of remaining mainstream maintenance
# Less Common Transition Path to SAP S/4HANA Cloud Private Edition

| Source     | Transition            | 1 <sup>st</sup> Destination | Transition        | Final<br>Destination |
|------------|-----------------------|-----------------------------|-------------------|----------------------|
| SAP ERP on | DB migration followed | SAP ERP                     | System Conversion | SAP S/4HANA Cloud    |
| Any DB     | by Lift & Shift       | on HANA                     |                   | Private Edition      |

Carefully consider this option as it requires two complicated projects, which results in:

- 1 Double the Effort
- 2 Double the Cost
- 3 Double the Downtime
- 4 Double the Time to Innovate

### **New Implementation Process**

Software Installation

SAP provisions a new

instance in the cloud

Pre-Configuration Content Activation

Choose from:

SAP Best Practices for SAP S/4HANA Cloud Private Edition

Enterprise Management Layer for SAP S/4HANA

SAP<sup>®</sup> Qualified Partner-Packaged Solution Software Configuration

Implementation consultants configure and design the new SAP S/4HANA system

#### Initial Data Load

Migrate master and open transactional data from the legacy system(s) with the SAP S/4HANA Migration Cockpit

# System Conversion Process

#### **Selective Data Transition Process**

**Provision Target System** 

Backup & Restore

Release 2023

Release 2023

Software Provisioning Manager

- Backup current system
- Restore on target system

# Transitioning from SAP ERP on Any DB to SAP HANA

SUM provides the "DMO" option that combines the software upgrade with the database migration.

## Building the Implementation Team

After completing this unit, you will be able to:

- Describe the key stakeholders
- Explain the roles and responsibilities of the project team members

# Key Stakeholders

#### SAP Activate Methodology Phases

## Project Team Structure

# Overview of SAP S/4HANA Cloud Private Edition Services and Responsibilities

# Defining System Landscapes

😤 2 Lessons 🛛 🥚 40 mins

After completing this unit, you will be able to:

- Get familiar with the system landscapes used to implement SAP S/4HANA Cloud Private Edition
- Identify additional system landscapes relevant to SAP S/4HANA Cloud Private Edition
- Get familiar with the SAP S/4HANA Cloud Private Edition release upgrade schedule
- Learn how to use important release upgrade resources

# SAP S/4HANA Cloud Private Edition Systems

# SAP for Me

# **SAP Cloud Identity Services**

#### \* Identity Authentication Service (IAS):

- Cloud service for authentication, single sign-on (SSO), and user management.
- \* Acts as an identity provider or integrates with existing SSO infrastructure.
- \* Identity Provisioning Service (IPS):
  - Comprehensive, cost-effective approach to identity lifecycle management in the cloud.
  - Facilitates provisioning of identities and their authorizations to various applications.

#### Authentication:

- Provides authentication services for SAP cloud and on-premise applications.
- \* Supports single sign-on for a seamless user experience.

#### **User Management:**

- Manages user identities, enabling efficient user lifecycle management.
- Integrates with existing identity and access management systems.

#### Provisioning:

- Facilitates identity provisioning to diverse applications.
- Manages authorizations to ensure secure and controlled access.

## SAP Business Technology Platform (BTP)

#### Release Upgrade Schedule

## Setting Up Systems for Implementation

🔄 4 Lessons 🛛 🥥 1 hr 25 mins

After completing this unit, you will be able to:

- Review the communications delivered to customers after purchasing SAP S/4HANA Cloud
- Provision Systems in SAP for Me
- Set up the implementation project in SAP Cloud ALM
- Identify a system to deploy from the SAP Cloud Appliance Library
- Analyze current business processes with Signavio Process Insights, discovery edition
- Perform the Readiness Check on the customer's existing system
- Use the Business Transformation Center apps to evaluate your business data
- Initiate the technical system conversion
- Activate SAP Fiori

#### **Onboarding Communication Journey**

## System Conversion

- 1. Analyze current business processes with Signavio Process Insights, discovery edition
- 2. Perform the Readiness Check on the customer's existing system
- 3. Use the Business Transformation Center apps to evaluate your business data
- 4. Initiate the technical system conversion
- 5. Activate SAP Fiori

## SAP Signavio Process Insights, discovery edition

SAP Signavio process Insights (with future developments)

#### SAP Readiness Check in SAP for Me

The SAP Readiness Check assesses the **functional** and **technical** aspects of converting an SAP ECC system to SAP S/4HANA on premise or SAP S/4HANA Cloud Private Edition by comparing the customer's actual system against the SAP S/4HANA Simplification Items.

#### **SAP Business Transformation Center**

#### SAP ERP Usage and Data Profiling

SAP Readiness Check for SAP ERP Usage and Data Profiling helps customers to get insight into the setup and usage of their SAP ERP 6.0 system from a functional perspective by providing valuable data about implemented functionality, component usage, and organizational structure.

For detailed guidance on the implementation and execution of SAP Readiness Check for SAP ERP Usage and Data Profiling, see SAP Note **3112362**.

- 1. Run the SAP Readiness Check for SAP ERP Usage and Data Profiling via SAP for Me
- 2. Log into SAP Cloud ALM & upload the output in the Manage Analysis Files app
- 3. Create a new blueprint in the Manage Digital Blueprints app

## SAP Fiori Rapid Activation

Activation of individual apps leads to high upfront investment to experience SAP Fiori

Creating Users and Defining Authorizations

🗢 4 Lessons 🛛 🥥 1 hr 35 mins

After completing this unit, you will be able to:

- Describe an overview of Identity Access Management in SAP S/4HANA Cloud Private Edition
- Create users in SAP S/4HANA Cloud Private Edition
- Navigate the SAP Fiori Launchpad content assignment
- Assign applications to users
- Manage content on the SAP Fiori Launchpad
- Manage the layout of content on the SAP Fiori Launchpad

### User Authorization Terminology

## SAP Fiori Launchpad UI Terminology

### Tools for Managing Launchpad Layout

### Gathering Data in Fit-to-Standard Workshops

🕾 4 Lessons 🛛 🥥 45 mins

After completing this unit, you will be able to:

- Describe an overview of the Fit-to-Standard Analysis process flow
- Prepare system and schedule workshops
- Demonstrate business processes and gather requirements
- Describe the purpose of design workshops

## Fit-to-Standard Analysis / Design Workshops Overview

### System Options for Fit-to-Standard Workshops

SAP S/4HANA Fully-Activated Appliance

Deploy via SAP Cloud Appliance Library

Access in ~2 hours

SAP Best Practices & Fiori activated in configured system

30-day software free trial; pay for hosting (~3 € per hour)

Cannot transfer configuration to productive landscape SAP S/4HANA Cloud Private Edition Customer Evaluation System

Provisioned by SAP Enterprise Cloud Services (ECS)

~30 days to build, 6 month subscription

Empty system; work with ECS to activate SAP Best Practices/Fiori or run a Sandbox conversion

Expensive (cost varies); better for large customers

Can transfer configuration to productive landscape

Converted Sandbox System

Customer's productive system is copied into sandbox & converted by partner consultants

Time varies to finish initial conversion

Use **Fully-Activated Appliance** for demonstrating compatibility scope processes & new features

## Approach to Fit-to-Standard Analysis Workshop Delivery: New Implementations

### Approach to Fit-to-Standard Analysis Workshop Delivery: System Conversions

### **Design Workshops**

Validating and Configuring Business Processes

## 😤 3 Lessons 🛛 🥚 20 mins

After completing this unit, you will be able to:

- Activate the business process content and make initial configurations
- Confirm processes have not been impacted and identify improvement opportunities
- Evaluate need for partner-developed solutions

### **Deploying SAP Best Practices for a New Implementation**

SAP Best Practices content is deployed via SAP Solution Builder using the SAP GUI

### **New Implementation**

### SAP S/4HANA Cloud Private Edition Standard Services (included in contract)

For a new implementation, SAP will execute the following technical tasks based on the customer's requirements:

- •Implement SAP Best Practices and similar packages
  - Initial scoping of the business processes occurred in the Discover Phase with the Digital Discovery Assessment. These processes would have then been validated during Fit-to-Standard workshops. Using this information, the customer/partner informs SAP of the best practices they want activated during the initial system provisioning.
  - Implementation of SAP Best Practices includes activation of required business functions in client 000, provisioning of a client with the desired client setup alternative, and Best Practice business process activation in the system. Note that some business processes may require additional licenses.
- •Install a preconfigured system from an SAP-delivered template solution in a cloud skeleton system
  - This service must be requested during the initial system provisioning in the Prepare phase.

### **Application Services delivered by Partners (separate contract)**

Customer-specific tasks, such as configuration and customizing the solution to customer requirements

### **Confirming Business Processes in a System Conversion**

# Sprint 1 0

Testing current processes in converted system

Sprint 2

Identifying improvement opportunities with SAP Fiori apps

### SAP Partner Certified & Packaged Solutions

### SAP Certified Solutions Directory.

### Working with the SAP Fiori Launchpad

😚 6 Lessons 🛛 🥥 1 hr 30 mins

After completing this unit, you will be able to:

- Navigate the SAP Fiori Launchpad
- Access the embedded support and Joule
- Manage Teams and Responsibilities
- Review the Situation Handling Framework
- Explore flexible Business Workflows
- Describe the embedded analytical applications and capabilties
